

Daily Self-Screening Protocol

Tasks

- Daily Self-Screening protocol is distributed to all employees and returning students for home self-screening
- Taskforce team prepared to receive inquiries or reports of symptomatic employees and students prior to the start of the workday

The Daily Self-Screening Protocol is in place to try and prevent sick or symptomatic employees from leaving their homes and decrease the likelihood of spreading infection.

- If the employee/student does not recognize symptoms in their Daily Self-Screening and:
 - If the employee/student is deemed symptomatic upon reporting to school, reference the On-Site Health Screening Protocol.
 - If the employee/student is deemed symptomatic while at school or after the employee/student has spent any time at the school (after the On-Site Health Screening), reference the Isolation Protocol.
- Reference the Self-Quarantine and Return to School Protocol for employees and students who are confirmed positive for COVID-19 by a medical professional.

Behavioral Best Practices

- Introduce a new handshake/hug that is touchless with your students.
- You can bow, clasp your hands in front of your chest, or put your hand over your heart as some men and women do in cultures that frown on physical touch.
- Keep it light – don't carry things from home to school.
- Reduce the chance that a contaminated surface travels with you.
- Clean off all the desks and tables and maintain a clean workspace.
- Make sure nothing comes in contact with your desk that you do not need.
- Don't carry around your laptop in the classroom. Keep it stationary and use your laptop rather than a separate keyboard and mouse.
- Use your cell phones and refrain from using the classroom phone.
